

PREMIUM ONE-WAY TUBING SWIVEL

The Premium One-Way Tubing Swivel is used in conjunction with tubing rotators to allow the tubing to be rotated during production. The One-Way Tubing Swivel is designed to allow torque anchors and right hand set tension anchor catchers to be set. Once the swivel is sheared with right hand torque, the tubing is able to rotate with right hand torque only. If left hand torque is applied, the unique multicam mechanism engages, allowing the torque anchor or right hand set anchor to be unset.

The Premium One-Way Tubing Swivel has a robust design that offers reliable, continuous functioning under high torque loads.

Tubing Swivel Size		Maximum OD		Minimum ID		Total Length	
inch	mm	inch	mm	inch	mm	inch	mm
2 7/8"	73.0	4.20"	106.7	2.441"	62.0	23.5"	596.9
3 1/2"	88.9	4.75"	120.7	2.992"	76.0	23.5"	596.9
